

PTA20-FL

When lightness matters!

Smart fuel transport and storage

Our Bedcover Aluminium tank is a safe and flexible helping hand at the workplace. Thanks to its low profile, it is suitable for most pickup trucks with bed-covers or roll-tops. The lightweight material makes a huge difference on your loading platform, reducing the wear on your vehicle and freeing more space for other equipment.

The aluminium pickup tank is suitable for:

- Civil engineering
- Forestry
- Haulage

Certifications & approvals

The product is approved and certified as IBC container (Intermediate Bulk Container) in accordance with the following regulations and recommendations:

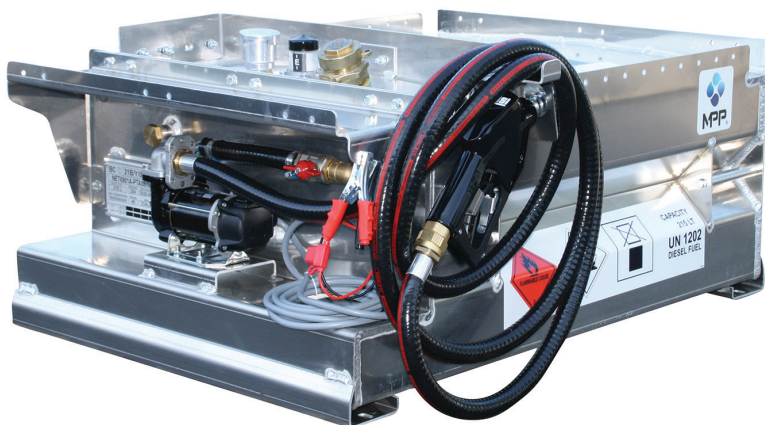

UN (UN's recommendations for transport of diesel etc.)

ADR (European regulations for international road transport of diesel etc.)

RID (international regulations for rail transport of diesel etc.)

IMDG (code for international maritime transport of diesel etc.)

PEFC (PEFC is a system for sustainable forestry certification)

About MPP

MPP is a family-owned company in Fjärps, western Sweden, which has been operating on the Scandinavian market since 2004. We design and sell sustainable fuel tanks, diesel cisterns and fuel facilities for secure storage, handling and transport of fuels. Our target group are primarily rental, construction, haulage, forestry and agricultural companies, which, just like us, have high ambitions concerning quality, safety and the environment. Our brand promise is: **Safe and flexible fuel handling**

Portable and flexible, for easy handling

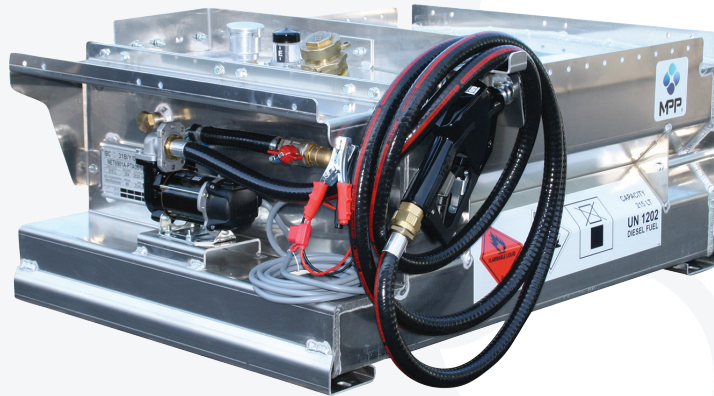

The pickup tank's smart design makes it safe, flexible and easy to handle. The four handles mean it is easy to lift, and the lightweight material makes a big weight difference on your pickup platform, for example, helping to reduce vehicle wear. The tank also has our innovative protective runners with associated brackets allowing permanent lashing to the platform.

Smart design

The tank is designed to be tall, leaving more space free for transport. The pump is fitted to the front for easy access, and the holders for the refuelling hoses and diesel handle can be positioned wherever is most convenient. The upper rim has fixing brackets on all sides.

IBC tank with registered design and no expiry date

UN/ADR certified IBC tanks made of plastic have a certification time limit of up to five years. Because our tank is made entirely of aluminium, there is no such best-before date for certification. The tank material is maintenance-free too, keeping the fuel clean while it is being stored. The pickup tank is protected with a registered design in the EU and Norway.

Tank specifications

Product no.:	101523	101520
Description:	Bedcover Aluminium tank, 185 l	Bedcover Aluminium tank, 200 l
Designation:	PTA18-FL	PTA20-FL
Volume, 95% (l)*:	185 L	205 L
Length (mm)**:	1030	1030
Width (mm)**:	730	730
Height (mm)**:	420	450
Net (kg)***:	48,5	50,8

*Estimated volume **Stated dimensions +/- 10 mm.

***Estimated weight when fully equipped with pump gear installed.

Standard equipment

Lifting and lashing brackets on all 4 sides.

Protective feet with mounting brackets for the platform.

Ball valve and hose connector for 3/4" supply.

2" analogue level sensor, 2" tank cap, 1" pressure relief/vacuum valve.

Upper rim with mounting brackets for refuelling hoses and diesel handle holder.

Accessories

- Pump kit 12 V12 V, 36 l/min*
- Pump kit 24/12 V, 39/22 l/min*
- Runners (for lifting by forklift), 400 l

Art.nr:
100231
101016
100134

* Package including automatic refuelling nozzle, 4-metre refuelling hose, 4-metre cable with battery connectors, 1 right-mounted diesel handle holder, 1 refuelling hose holder and bolts and lock nuts.
