

TT40

Mobile Fuel Tank 400 L

Lightweight and Convenient

Mobile Fuel Tank 400 litres is a compact ADR approved fuel tank, packed with smart functions to maintain safe and convenient fuel handling. It is a smaller version of our TTC Compact 1-3 m³. The inner-tank is made out of aluminium which makes it lightweight and rust free.

MPP's TT40 is suitable for:

- Rental
- Construction
- Temporary Heating
- Backup Power
- Demolition
- Bulding sites

Certifications & approvals

- The product is approved and certified as IBC container (Intermediate Bulk Container) in accordance with the following regulations and recommendations:
 - UN** (UN's recommendations for transport of diesel etc.)
 - ADR** (European regulations for international road transport of diesel etc.)
 - RID** (international regulations for rail transport of diesel etc.)
 - IMDG** (code for international maritime transport of diesel etc.)
 - PEFC** (PEFC is a system for sustainable forestry certification)

About MPP

MPP is a family-owned company in Fjärås in Western Sweden, and has been operating in the Scandinavian market since 2004. We manufacture approved mobile diesel tanks, fuel stations and stationary fuel tanks that are developed for the Nordic climate. We mainly work with companies involved in rental, construction, haulage, forestry and agriculture which, like us, have high standards in terms of quality, safety and the environment.

MPP is a committed partner whose products – from mobile fuel tanks to complete fuel stations – are safe and easy to use. Our brand promise is: **Fuel management in a safe and convenient way**

Standard equipment

The bottom of the tank is designed to lift from any of the 4 sides with a pallet truck or any fork equipment.

Fork lifting pockets from both long sides to maintain safe and secure lifting.

Lifting brackets for lifting with a crane or any sling equipment.

Lightweight inner-tank for easy lifting and less wear and tear on axles. Rust-free to maintain clean fuel quality.

Cab design pump-lid for convenient handling especially when the tank sits on a truck bed.

Approved for stacking two tanks full and three tanks empty.

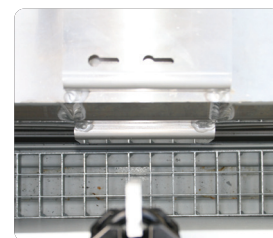

Hose lead-through (plugged) for continual feed, whilst lid remains locked.

Concealed hinges for pump-lid

Robust lock hood for high class padlock

Space to store hose clean and protected

The tank is rental-ready and prepared with two feed and two return connections to connect to power generators, heaters and backup power

Removable inner-tank for inspection and maintenance

Tankspecifikationer

Art. no:	101289
