

# Tank on Wheels

- Versatile, functional and smart tank

## The portable and smart fuel tank!

**With our fuel tank on wheels you can transport fuel both easily and safely.**

The fuel tank makes it possible for you to transport fuel, up to 250 litres, directly to the workplace. The tank is smartly equipped with swivel wheels, which make the transport and handling very smooth. The narrow structure of the fuel tank allows it to go through small passages and surfaces. A practical and portable fuel tank suitable for all types of workplaces where handling of diesel is necessary.

Tank on Wheels is suitable for:  
Building sites and Power units

### Certification and approval

- The product is certified as an IBC (Intermediate Bulk Container) packaging in compliance with the following regulations and recommendations:
  - UN** certified (UN's recommendation for transport of fuel)
  - ADR** certified (European regulation relating to international road transport of fuel)
  - RID** certified (International regulation for transport of fuel, by rail)
  - IMDG** certified (a code for international transport of fuel, by sea).
- Designed in accordance with NFS 2003:24 standard (the Swedish Environmental Protection Agency's provisions concerning storage of, fuel in Swedish water protection areas).

## ABOUT MPP

We are a family-owned company in Fjärås which has been providing innovative fuel management solutions to the Scandinavian market for more than 10 years

We market and sell environmentally smart cisterns and tanks for transport, storage and handling of fuel and engine oil. We also design new solutions. Both in close cooperation with our customers and when market demand is expected to grow.

## Small details - that make a difference

We have selected materials with care in order to make a versatile and durable tool for you. The inner tank is in lightweight aluminium. This way we can guarantee optimum weight. Another just as important advantage is that the fuel in the tank remains pure because aluminium prevents the spreading of corrosion. This fuel tank is also supplied with smart features such as the cross-bent protective cover for water drainage and foam filled wheels for safety and puncture proof. Also equipped with a nozzle holder.

## A transportable fuel tank with easy handling

Our fuel tank is easy to transport and move. Due to the swivel rubber wheels and the two handles on the short sides of the tank, it is easy to take the tank with you and move it. The sturdy rubber wheels with lock function are carefully chosen for easier handling even on uneven surfaces.

We know that all workplaces look different and require different equipment. That is why our fuel tank is designed in such a way that you can use it in several different types of workplaces and surfaces.

## Smart features that contribute to a better workday

We have thought about the details. The design of the structure is neat, not wider than 76 cm, which enables it to go through narrow passages, fit in in elevators and other restricted areas. This way you can bring your fuel tank to locations you might not have thought possible before.

The lockable tank cover in combination with hose lead-throughs, contributes to a secure and easier handling when supplying fuel to external devices and units.

## Tank specifications

Art. no.:	2-01-0610
Description:	Tank on wheels, 250 L
Designation:	TH25
Fill volume, 91% (l)*:	245
Length: (mm)**:	1490
Width: (mm)**:	760
Height: (mm)**:	1230
Net: (kg)**:	209

Dark grey,  
RAL 7037

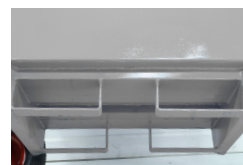

110%  
environment  
enclosed

## Standard equipment

- Two pairs 1/4" suction and return connections with 60° cone sealing (incl. ball valve and non-return valve), overfill prevention gauge, 3/4" ball valve feed connection, 2" filler connection, 2" vent with built-in overpressure and vacuum and 2" analogue level indicator.
- Handle brace with lifting device and load-securing attachments on both short sides.
- Tank cover with handle and padlock function
- 360° swivel foam-filled rubber wheels with lock feature.

- Tank cover clasp.
