

TT Compact

Versatile and compact

With its smart design, our transport tank makes it easy and safe to transport diesel. It is ergonomic, easy to use and protected against theft. It is a practical and portable fuel tank suitable for all types of workplaces where diesel is handled.

MPP's TT Compact is suitable for:

- Rental
- Construction
- Temporary Heating
- Backup Power
- Demolition

Certifications & approvals

- The product is approved and certified as IBC container (Intermediate Bulk Container) in accordance with the following regulations and recommendations:
 - UN** (UN's recommendations for transport of diesel etc.)
 - ADR** (European regulations for international road transport of diesel etc.)
 - RID** (international regulations for rail transport of diesel etc.)
 - IMDG** (code for international maritime transport of diesel etc.)
 - PEFC** (PEFC is a system for sustainable forestry certification)

About MPP

MPP is a family-owned company in Fjärås in Western Sweden, and has been operating in the Scandinavian market since 2004. We manufacture approved mobile diesel tanks, fuel stations and stationary fuel tanks that are developed for the Nordic climate. We mainly work with companies involved in rental, construction, haulage, forestry and agriculture which, like us, have high standards in terms of quality, safety and the environment.

MPP is a committed partner whose products – from mobile fuel tanks to complete fuel stations – are safe and easy to use. Our brand promise is: **Fuel management in a safe and convenient way**

Standard equipment

Cab design pump-lid for convenient handling.

Pump room with extra space for storage of tools and containers

Approved for stacking two tanks full and three tanks empty.

Inward-bent tank sides that protect paint work and company profile.

Easy-access inspection lid for the inner-tank.

2" valve for simple venting when filling

Hose lead-through (plugged) for continual feed, whilst lid remains locked.

Concealed hinges for pump-lid

Lifting bracket for lifting with crain. Also designed to secure with lifting straps.

4-way fork-lifting pockets

Interchangeable flange connections. L-R from top. Inspection lid, safety plug, pressure vacuum release valve, analogue level meter, fill protection thermistor, 1 pc 1" suction pipe with a valve for pump, 1 pc 1/2" suction pipe with valve, 1 pc 1/2" return pipe with a valve, 1 pc extra socket for suction, 1 pc extra socket for return, analogue level meter, 2" tank filler coupling.

Man-way is placed under the blockade pump-lid for higher theft protection. Valves and connections can be customised to suit your needs.
